

WHITE PAPER

SAITAMA

We think that the time of cat and dog themed meme tokens that are proliferating today is over. Now is the time for noble and gregarious alpha wolves!

www.newsaitama.com

ABOUT US

New Saitama is liquidated through Raydium, which is part of SOLANA's ecosystem. One of the biggest reasons we chose the most popular network for meme tokens is the fast and cheap gas fee. New Saitama: Inspired by a legend that appeared on a winter day in the Chichibu outskirts of Saitama Prefecture, Japan, and resembled a wolf rather than a dog. It has no connection with the founders of the previously bankrupt Saitama token.

New Saitama Coin Distribution

70%	15%
Our Investors and Holders	Market
5%	10%
Broker	Our Financier

ROAD MAP

- 1-) Advertisement, Registration and Website Update

- 3-) NEW SAITAMA buyback (Every week, Every month)
- 4-) Stock market listings (Tier3, Tier2)
- 5-) Tier1 stock market listing when we reach 100 Million market value

New Saitama's Development

The NEW SAITAMA community values supporting each other, acting collectively like a wolf, joking, having fun and being serious about some issues.

There is a saying in the crypto industry, meme tokens are of no use and will die over time! Yes, meme tokens may not be of any use but money is important in the world! New Saitama is also a currency and is calculated in Dollars and Bitcoin.

We can develop by reaching larger communities and sign bigger projects over time. This is entirely up to alpha wolf investors.

In order for New Saitama to grow and develop and be productive, the Wolf community needs to act together. Buying and selling your tokens, making profits or losses is completely in your hands, as is holding them in your hands and always supporting and growing them.

What Are We Aiming For?

First of all, when you enter the crypto sector, one of the important parts you need to know about the projects is whether they make money or not!

When NewSaitama whales make a profit, we will include professional traders who are not affiliated with any institution or organization; 1 Broker, 5 traders, 5 spot trading, 5 leveraged transactions.

With the profits obtained by brokers and traders, we aim to add more value to the price by buying back the new saitama token.

Since the crypto sector is up and down, sometimes the desired situations may not happen. Since we trust our community and big investors, we hope that the Broker team will achieve great things over time with the financial support they will provide.
